## PROFESSIONAL SUMMARY

Frontend and Full Stack Developer with 4+ years of combined engineering and software experience. Transitioned from a mechanical engineering career into software development through intensive upskilling (NIIT, 2023–24), bringing strong systems-thinking to every product. Skilled in React.js, TypeScript, Python, OpenAI API, and n8n automation. Proven ability to deliver end-to-end production applications with measurable outcomes (95+ Lighthouse scores). Actively building AI-integrated solutions and seeking full-time or remote frontend/full-stack roles.

## WORK EXPERIENCE

### Frontend Developer & Python Automation Engineer

EMPRIO Startup (Freelance) — Remote | Jan 2026 – Present

- Engineered a high-performance startup marketing platform from scratch using React.js, Vite, and Tailwind CSS, achieving a 95+ Lighthouse performance score.
- Architected scalable multi-page frontend with reusable component structures, reducing future feature development time by 20%.
- Implemented Framer Motion animations, dark mode, and seamless page transitions for full cross-device consistency.
- Integrated OpenAI API and n8n automation workflows for internal business process automation and lead management.

### Freelance Full Stack Developer

Self-Employed — Remote | Jun 2025 – Dec 2025

- Built a premium personal portfolio site using React.js, Vite, and Framer Motion with 3D visuals and recruiter-focused UI, deployed on Netlify.
- Developed an enterprise-grade HR Operations Platform in Python/Streamlit covering multi-country payroll (Singapore & Indonesia), forensic reconciliation, and audit automation across 7+ functional modules.
- Deepened expertise in AI tooling — OpenAI API, n8n, Cursor, GitHub Copilot — and full-stack architecture through self-directed projects.

### Team Leader – Technology Projects

Cyfuture — Noida | Oct 2024 – May 2025

- Spearheaded cross-functional teams across multiple high-impact client projects, ensuring 100% alignment with milestones and technical specifications.
- Optimised project workflows through structured task delegation and real-time coordination, significantly reducing development bottlenecks.
- Directed end-to-end QA processes, maintaining production-ready code standards within strict client timelines.
- Facilitated stakeholder communication, bridging technical teams and client requirements.

### Career Transition — Software Engineering Upskilling

Self-Directed | Jul 2023 – Oct 2024

- Completed Software Engineering Program at NIIT (Aug 2023 – Mar 2024) covering Java, Spring Boot, Angular, React.js, REST APIs, Microservices, MySQL, and MongoDB.
- Built multiple full-stack projects applying newly acquired skills, transitioning from mechanical engineering to software development.
- Secured a technology leadership role at Cyfuture on completion of programme.

### Junior Engineer

Nikon Survey and Engineering Services LLP — Noida | May 2021 – Jul 2023

- Managed equipment setup and pneumatic instrumentation workflows across client sites.
- Coordinated client requirements and resolved technical issues efficiently under tight deadlines.
- Developed strong analytical and problem-solving skills that later translated into software engineering practices.

## KEY PROJECTS

**EMPRIO Marketing Platform | Jan 2026 – Present**

- Startup marketing site with Framer Motion animations, dark mode, router navigation, and 95+ Lighthouse score.

**Tech:** React.js, Vite, Tailwind CSS, Framer Motion, OpenAI API, n8n

**Enterprise HR Operations Platform | 2025 – 2026**

- Streamlit enterprise platform for multi-country payroll (Singapore & Indonesia), cost reporting, headcount analytics, variance analysis, and E-Banking automation across 7+ modules.

**Tech:** Python, Streamlit, Pandas, REST APIs, CSS

**Online Cake Ordering System – Cake Palace | 2024**

- Full-stack e-commerce app with role-based access (Admin/User), JWT authentication, and secure REST APIs.

**Tech:** Angular, Spring Boot, MySQL, MongoDB, JWT

**Kanban Board Application | Jan – Feb 2024**

- Workflow management system with real-time task tracking and role-based team access.

**Tech:** Angular, Spring Boot, MySQL, Java

**TECHNICAL SKILLS**

|              |                                                                                                               |
|--------------|---------------------------------------------------------------------------------------------------------------|
| Frontend     | React.js • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Angular • Framer Motion |
| Backend      | Java • Spring Boot • Node.js • REST APIs • Microservices • .NET                                               |
| Python & AI  | Python • Streamlit • OpenAI API • n8n Automation • Pandas • Data Processing                                   |
| AI Dev Tools | Cursor • GitHub Copilot • Claude (Anthropic) • ChatGPT • Prompt Engineering                                   |
| Databases    | MySQL • MongoDB • JSON                                                                                        |
| Tools        | Git • GitHub • Vite • Postman • JUnit • Responsive Design • API Integration                                   |

**EDUCATION**

|                      |                                                 |          |
|----------------------|-------------------------------------------------|----------|
| B.Tech / Engineering | Maharaja Agrasen Institute of Technology, Delhi | Nov 2020 |
| Class XII & X        | Kendriya Vidyalaya Andrew's Ganj, Delhi         |          |

**CERTIFICATIONS & COURSES**

**Software Engineering Program — NIIT | Aug 2023 – Mar 2024**

*Covered: Java, Spring Boot, Angular, React.js, REST APIs, Microservices, MySQL, MongoDB*
